

Historical Global Methyl Bromide Sales

Global Historical Sales of Methyl Bromide by Region, 1984-1996 (MT)

Year	North America	Europe	Asia	Subtotal	Other Regions	Total Sales	Total Sales (1,000 lbs.)
1984	19,659	11,364	10,678	41,701	3,871	45,572	100,468
1985	20,062	14,414	9,743	44,219	4,054	48,273	106,423
1986	20,410	13,870	11,278	45,558	4,897	50,455	111,233
1987	23,004	15,339	12,816	51,159	4,531	55,690	122,774
1988	24,848	17,478	13,555	55,881	4,729	60,610	133,621
1989	26,083	16,952	14,386	57,421	5,149	62,570	137,942
1990	28,101	19,119	14,605	61,825	4,074	66,644	146,923
1991	31,924	18,020	17,396	67,340	6,260	73,600	162,259
1992	29,466	18,521	16,944	64,931	6,654	71,585	157,816
1993	30,723	18,286	17,185	66,195	6,463	72,658	160,182
1994	31,981	18,052	17,427	67,460	6,271	73,731	162,547
1995	28,965	16,350	15,784	61,099	7,758	68,857	151,802
1996	29,679	16,753	16,173	62,605	8,820	71,425	157,464

Note: Other Regions includes Africa, South America, and Australia.

Percent Global Methyl Bromide Sales - 1996

Global Methyl Bromide Sales/Consumption

- Total global sales/consumption of methyl bromide is based on historical sales reported by UNEP (1995, 1998, 2000), ICF estimates (1996 and 1997), and 1995 and 1996 consumption data from various sources.
- Regional sales estimates were based on consumption data for each country in each region.
- North America accounts for approximately 42 percent of total global consumption, of which approximately 92 percent is consumed in the U.S.
- Europe accounts for approximately 23 percent of total global consumption. France is the largest consumer.
- Asia accounts for approximately 23 percent of total global consumption. Japan and China are the largest consumers.
- Other major areas of consumption include Africa and S. America. Together these regions account for approximately 12 percent of total consumption.
